PROFILE

"Laravel Developer with 3+ years of experience in developing scalable web applications and APIs. Skilled in RESTful API development, MySQL optimization, and modern PHP practices. Proficient in Laravel ecosystem tools like Livewire, Queues, and WebSockets, with a strong focus on performance and clean code."

WORK EXPERIENCE

Kuwait Club for Mind Games (https://kmsa-kw.com/en)
Full-Stack Laravel Developer

- Developed a bilingual website (Arabic/English) for the Kuwait Mind Sports Association, focusing on mind games such as chess and other intellectual competitions.
- Created a dynamic content management system to handle events, tournaments, news, and player profiles.
- Designed and implemented a custom admin panel with role-based access for organizers and moderators.
- Integrated features such as tournament registration forms, result listings, and media galleries.
- Ensured responsiveness, SEO optimization, and fast loading for an engaging user experience.

E-Learning Platform for Private Tutor
Full-Stack Laravel Developer

- Course and video lecture management.
- Online quizzes and exams with instant grading.
- Student registration and tracking of progress.
- Built a user-friendly dashboard for both students and the admin.
- Ensured mobile responsiveness and cross-browser compatibility.

3. Multilingual E-Commerce Platform
Full-Stack Laravel Developer

- Built a fully functional and multilingual online store with:
- Live Chat feature (using Laravel WebSockets & Reverb).
- Multiple secure payment gateways (e.g., Tap, Stripe).
- Dynamic shipping system based on user location.
- Smart shopping cart using AJAX and LocalStorage for guest users.
- Order management dashboard with filters, status updates, and email notifications.
- Integrated coupon system, product variations, and stock management.
- Enhanced user experience through real-time notifications and smooth checkout process.
